관리 --> 설정

The screenshot shows the VS Code settings interface. On the left, the 'Extensions' view is active, displaying a list of installed extensions. The 'Settings' icon (a gear) is highlighted with a red box. In the center, the 'wrap' search filter is applied to the settings list, with the search bar itself highlighted by a red box. The 'Editor: Word Wrap' setting is highlighted with a red box, showing it is set to 'on'. The 'Diff Editor: Word Wrap' setting is also visible, set to 'inherit'.

wrap

사용자

- 일반적으로 사용되... (1)
